

<b>NAME</b>	<b>KIRAN SHIRAGUMPI</b>
<b>PROJECT NAME</b>	<b>Arithmetic Calculator</b>
<b>Phase and Batch</b>	<b>Java FSD Phase-1, Feb-Mar 2022</b>

### Technology:

- Java Programming

### Java concepts:

- Variables
- Data type
- Operators
- Class
- Objects

### Project Folder Structure:

### Source Code:

```
package mypackage;

import java.util.Scanner;

public class CalculatorClass
{
    public static void main(String[] args)
    {
        int num1,num2;
        Scanner sc=new Scanner(System.in);
        System.out.println("Enter First Number:");
        num1=sc.nextInt();
        System.out.println("Enter Second Number:");
        num2=sc.nextInt();
    }
}
```

```
System.out.println("Arithmetic Operations of two numbers are:");
System.out.println("Addition of two numbers:"+(num1+num2));
System.out.println("subtraction of two numbers:"+(num1-num2));
System.out.println("Multiplication of two numbes:"+(num1*num2));
System.out.println("Division of tow numbers:"+(num1/num2));
```

```
}
```

```
}
```

## Project Screenshots:

The screenshot displays the Eclipse IDE interface. The top editor window shows the source code for `CalculatorClass.java`. The code defines a package, imports `java.util.Scanner`, and implements a `main` method that prompts the user for two numbers and performs arithmetic operations. The bottom console window shows the execution output, including the prompts and the results of the calculations.

```
CalculatorClass.java ×
1 package mypackage;
2
3 import java.util.Scanner;
4
5 public class CalculatorClass
6 {
7
8     public static void main(String[] args)
9     {
10         int num1,num2;
11         Scanner sc=new Scanner(System.in);
12         System.out.println("Enter First Number:");
13         num1=sc.nextInt();
14         System.out.println("Enter Second Number:");
15         num2=sc.nextInt();
16         System.out.println("Arithmetic Operations of two numbers are:");
17         System.out.println("Addition of two numbers:"+(num1+num2));
18         System.out.println("subtraction of two numbers:"+(num1-num2));
19         System.out.println("Multiplication of two numbes:"+(num1*num2));
20         System.out.println("Division of tow numbers:"+(num1/num2));
21
22     }

```

Problems @ Javadoc Declaration Console ×

<terminated> CalculatorClass [Java Application] C:\Users\kshir.p2\pool\plugins\org.eclipse.justj.openjdk.hot

Enter First Number:  
4  
Enter Second Number:  
4  
Arithmetic Operations of two numbers are:  
Addition of two numbers:8  
subtraction of two numbers:0  
Multiplication of two numbes:16  
Division of tow numbers:1
